Mean absolute difference: 0.0468
RMS difference: 0.0734

Pretrained TRIBE v2 · average subject · fsaverage5 (20,484 vertices) · identical 12 s silent static presentations
Mean over all 12 predictions; separate timelines. Native model timing includes its 5 s hemodynamic compensation.
Exploratory model predictions, not measured fMRI or validated complexity scores. Difference uses its own symmetric scale.
